Lab 24

Aim: Linked lists and Recursion

Create a project in Eclipse for lab 24.

Copy the classes developed for *Money* (*Bill, Coin, etc.*).

1. Using the linked list of Money,

    a. Write a recursive method which prints the values of each *Money* object in the list from first to last.

    b. Write a recursive method which prints the values of each *Money* object in the list from last to first.

    c. Write a recursive method which finds the sum of all the *Money* in the list.

    d. Write a recursive method which finds the sum of only the *Quarters* in the list.
